

# Unique Commercial Propositions

Our flexible commercial terms are specifically tailored for large clients across various sectors, enabling them to benefit from our advanced green technologies with minimal initial investment.

## Direct Purchase

Buy our efficient fuel utilisation solutions outright, allowing for immediate integration into your fleet or equipment.

## Leasing Options

Choose from flexible leasing arrangements that suit your financial planning and budgetary requirements.

## Performance-Based Payment

Opt for our innovative 'Free' offer, where payments are made from an agreed percentage of the fuel savings achieved, ensuring a risk-free adoption of our technology.

## Most Attractive To:

	<b>Government Transport Agencies</b> Official transport fleets, buses, cars, 2/3 wheelers.
	<b>Defense &amp; Military Organizations</b> Battle tanks, armored carriers, trucks, aircraft, naval vessels.
	<b>Railway &amp; Transit Authorities</b> Operators of train networks and railway transport.
	<b>Public Transportation Companies</b> Passenger bus fleets and public transit.
	<b>Mining &amp; Industrial Companies</b> Heavy transport machinery and industrial equipment.
	<b>Private Fleet Operators</b> Logistics, delivery, and commercial transport companies.
	<b>Marine &amp; Shipping Companies</b> Passenger and cargo ships, maritime transport.

## Advantages Through Our Flexible Commercial Models:

### Reduced Upfront Capital Expenditure

Avoid significant initial investment, freeing up capital for other critical operational needs. Transition from CapEx to OpEx.

### Immediate Cost Savings

Start realizing fuel efficiency gains and emission reductions from day one, leading to tangible operational cost savings.

### Scalability & Flexibility

Easily scale the deployment across your fleet or operations, with options for upgrades or adjustments as your needs evolve.
